PROFILE

Data Analyst and BI specialist with an MSc in Data Science and MBA in Business Management. 3+ years of hands-on experience building scalable data pipelines, ML models, and BI dashboards that drive real business decisions. Experienced across SQL, Python, Power BI, BigQuery, and Databricks — with a track record of taking full end-to-end ownership of analytical data products. Published researcher with a joint journal manuscript currently under review.

EXPERIENCE

Freelance Data Analyst

Mar 2025 – Present

Self-Employed · Fiverr / Upwork · Remote

- Design and deliver end-to-end analytical data products for international clients — full ownership from scoping to delivery
- Build Python & SQL pipelines, Power BI dashboards, and ML models generating actionable business insights
- Conduct consumer behaviour analytics, cross-channel data analysis, and KPI reporting across diverse industries

Business Analyst

Jul 2021 – Aug 2023

Ansh Soft Tech · Pune, India

- Independently designed data strategies from high-level requests — improving decision-making efficiency by 25%
- Built KPI dashboards and automated BI reports in Power BI and Excel, increasing reporting efficiency by 30%
- Designed and maintained data pipelines; ensured data accuracy above 95% through systematic validation
- Collaborated cross-functionally with business, product, and IT teams to translate requirements into scalable solutions

Operations Supervisor – Logistics

Apr 2018 – May 2019

Ecom Express · Kerala, India

- Analysed performance metrics and identified inefficiencies, improving operational efficiency by 15%

PROJECTS

Sentiment Analysis – Amazon Fine Food Reviews · MSc Thesis · 2025

End-to-end NLP & ML pipeline on 500K+ records. Real-time Flask deployment. Joint publication under review at a peer-reviewed journal.

PathPilot – AI Job Market Analytics Platform · Independent · 2026

Built autonomously — Python + NLP pipeline extracting structured market insights from unstructured job data at scale.

Predictive Analysis – Tanzania Water Pumps · ML Project · 2025

ML classification on real-world infrastructure data. Interactive dashboards for operational decision support.

Remote AI – Local Automation System · AI Systems · 2026

Locally installable AI automation using Ollama, Mistral AI, and MCP. Focus on system integration and task automation.
